To Whom it May Concern:

Re: CTB Windows & Doors - Letter of Recommendation

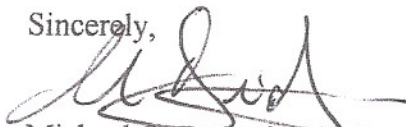

The services of CTB Windows were retained after an initial inspection of my home by the owner of CTB Windows, Travis Blais, provided a thorough and comprehensive presentation of the scope of work to replace windows in our home. Mr. Blais gave some insight on new ideas in window layout that some other companies did not think of (ie. installing an awning style window rather than a casement window in the kitchen providing more light).

Mr. Blais's knowledge in construction successfully facilitated the conversion of a window in the kitchen to a sliding patio door.

CTB Windows installed Homotech Windows - "Contour Series", a high quality energy star window, which is what we were looking for as an independent energy audit sponsored by the government required replacement with "Energy Star" windows to qualify for credits. The windows look great and the price was as attractive.

CTB Windows provided excellent service and workmanship. I would not hesitate to recommend this company for your window and door needs.

Sincerely,

Michael O. Drewniak, B.Sc.
